

Cambridge Syllabi Archive Notes

- This archive is organised into IGCSE and A Level folders, with subject subfolders.
- The PDFs are official Cambridge syllabus PDFs. Cambridge often publishes one syllabus PDF that covers multiple exam years and states the available sessions inside the document, so the archive uses those official multi-year PDFs rather than inventing separate files for each session.
- The folder currently has strong coverage for the science and business subjects, plus several humanities and language subjects. Some subjects from your original list are not yet fully populated in this pass, especially the separate mathematics strands and some language/humanities items.
- For Cambridge maths, Mechanics and Statistics are not normally separate stand-alone syllabus PDFs at IGCSE in the same way as A Level route papers, so they need to be handled through the main mathematics syllabuses.
- Business Studies 0450 remains in the archive for 2026; Cambridge indicates it is replaced by Business 0264 from 2027 onward.
